Assignment 5: Embedding Examples   (10 marks)

Pre-requisites:

- Complete and upload Assignment 3 and 4.
- Read the sections on **HTML iFrame**, **HTML CSS** and **HTML Block** on w3schools.com.

Overview:

You will be embedding external sources—such as Google Calendar, Google Maps, Google Forms, YouTube videos and other websites—into your pages via the <iframe> tag.

Google Applications are also emphasized.

Tasks/Evaluation:

1. Unzip and explore the contents of html05.zip from Assignment 5, to give you a better understanding of how HTML (content) and CSS (format/layout) files relate to each other and work together.

2. Learn how to embed the following sources into a webpage, by following examples on YouTube.
    a. Website
    b. Google Calendar
    c. Google Maps
    d. Google Form
    e. PDF via Google Docs
    f. YouTube video

3. Embed the following content into your webpages:

    a. Website: embed the school website. (1 mark)
    b. Google Calendar: mark down all the Pro-Ds this school year in monthly view. (2 marks)
    c. Google Maps: show the location of the school. (1 mark)
    d. Google Form: survey students their favorites (minimum 2 questions). (2 marks)
    e. PDF via Google Docs: display a PDF file via Google Docs (2 marks)
    f. YouTube video: show a demo on how to embed content into another page. (1 mark)

4. Save all and upload to /yourname/html05. (1 mark)
